

COOPERATIVE ECONOMIC INSECT SURVEY REPORT  
Glenn A. Salsbury, Survey Entomologist

Report 1, Volume 57  
February 6, 2009

PINE PITCH MOTH: No evidence of pitch moth activity was found in the following cities this week: Pratt, Medicine Lodge, Coldwater, Protection, Ashland, Dodge City, Kinsley, Minneola and Englewood.

PINE SAWYER: No evidence of this pest was found in the above cities surveyed.

ARMY CUTWORM: Only a single larva was found in one wheat field in Edwards County. Wheat was surveyed in the following counties: Kiowa, Barber, Comanche, Clark, Ford, Edwards and Pawnee. No ARMY CUTWORMS were found in alfalfa checked in the above counties.

BROWN WHEAT MITE and WINTER GRAIN MITE: None were found in the above counties surveyed.

CLOVERLEAF WEEVIL: No larvae were found in any of the alfalfa surveyed.

ALFALFA WEEVIL: No adults were found in alfalfa. This is unusual and it will be interesting to see what the infestations are like in the spring.

PEA APHID and BLUE ALFALFA APHID: None were found.

Conditions in Southcentral and Southwest Kansas are dry. The wheat surveyed ranged from 3-7 tillers and was not showing any new growth. Alfalfa in most cases was not yet showing new growth.
